## References

Please ensure that every reference cited in the text is also present in the reference list. Any references cited in the abstract must be given in full. The references will be cited sequentially in the text. Unpublished results is not recommended in the reference list. The following reference styles should be used:

References should be cited in the text as, e.g., [5], [6, p. 213], or [6, Theorem 2.1]. It is suggested that the theorem and page numbers be used for referencing instead of just a number representing an entire book or paper, and also that only those papers or books which are actually cited in the text be listed as references.
